

WI-FI QUICK GUIDE

Not all Internet is created equal.

NETWORK HIGHLIGHTS

Fully customizable.

Additional capacity is available with advance notice.

Bandwidth packages are built to ensure each user has the same experience and cannot be influenced by other groups on the network.

Group bandwidth reports are available.

The Meeting Network is isolated from the Public and Guest Room networks.

Seamless transition from conference Wi-Fi to guest Wi-Fi can be arranged through PSAV.

PORTAL/LOGIN PAGE

Internet access is provided through a Captive Portal webpage with passcode prompt.

The portal page can be bypassed and should be discussed with PSAV.

Forced first home page to display a home page of your choosing.

Custom branding by way of a unique wireless access point name.

BANDWIDTH

Available bandwidth in the Meeting Space is up to 300 Mbps.

Additional bandwidth requires advance notice and may be an additional charge.

On-site technical support is provided.
